

SHAW CONSTRUCTION OF TREND LAB BUILDING

9-1-2017

Shaw Construction did a fabulous job building my company's new 45,000 square foot office warehouse building. The entire Shaw team showed tremendous professionalism and competence throughout the build.

Shaw helped us review and select our final site, and then presented layout options to consider. They worked closely with the city of Savage for building approvals, and helped provide timely information for us to secure our funding. Their experience and preparation were impressive.

During the build, they provided simple project tracking tools allowing me to keep in touch with the progress made and next steps coming. We had a defined timeline, with a winter build, and no wiggle room. Their coordination and timing of all the components and project elements went so smoothly. I recognize that what they coordinated is not easy, and many things could have gone wrong along the way. However, their leadership and communication gave me complete confidence we could resolve whatever issues could have come up. Fortunately, no issues did come up.

Shaw actually delivered my completed project nearly 3 weeks ahead of the original promise date! This early access gave my company extra time to relocate over 35,000 square feet of warehouse inventory racked up 3 levels, as well as 30 employees, and our computer and phone network.

I highly recommend Shaw Construction, and thoroughly enjoyed working with them to build this exciting new phase in my business. We absolutely love our new building!
